Steelcase Flex Active Frames
Storage

Steelcase

Steelcase Flex Active Frames are adaptable structures that define space by creating productive, flexible and inspiring homes for teams. With a broad range of customizable configurations and technology integration, Active Frames provide shelter, privacy and space for teams to collaborate and do their best work in the hybrid workplace.

Statement of Line

These configurations are just a few ways that Active Frames can be built to support the workplace with both boundary and gathering attributes.

Applications

Flex Active Frames in a 5-high combined with a waterfall configuration creates shelter and privacy for this team space.

Flex Media Tower with table in a 5-high is integrated in a Flex Active Frames waterfall configuration promoting team collaboration in the open space. The adjacent Flex Active Frames work island hosts work tools and shared resources.

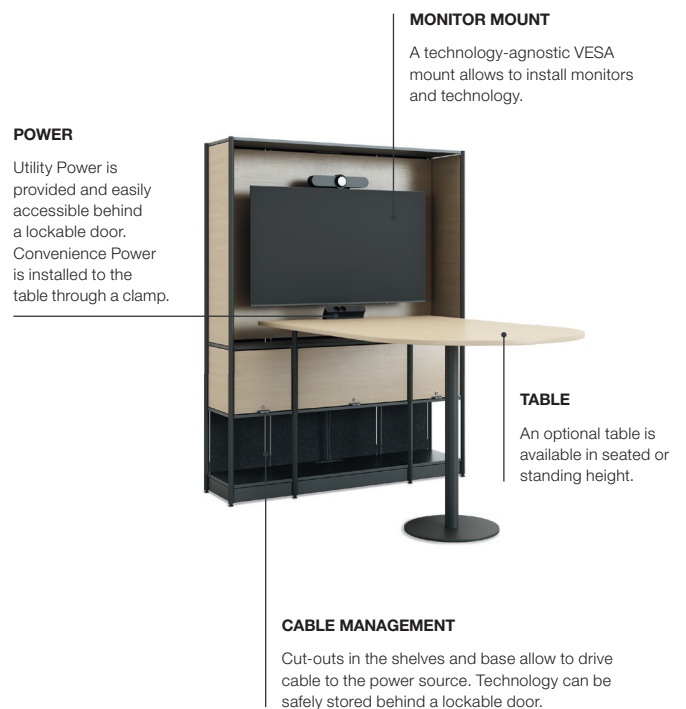

Flex Active Frames combined with a media tower in a 4-high with a table supports hybrid collaboration in an enclosed meeting room. The adjacent storage and the 1-high with a cushion provides space for personal belongings.

Flex Active Frames can be used on both sides for boundary and storage in the open. The media tower in a 4-high with an externally mounted monitor on one side supports impromptu hybrid collaboration.

Features + Options

FRAME

Consists of bases and tubes that provide the overall structure of the frame.

FIXED BOARD

Two sided fixed boards connect to the frame and are available in Whiteboard, PET/Whiteboard and Melamine.

MONITOR MOUNT

A technology-agnostic VESA mount allows to install monitors and technology.

POWER

Utility Power is provided and easily accessible behind a lockable door. Convenience Power is installed to the table through a clamp.

TABLE

An optional table is available in seated or standing height.

SHELVES

Melamine shelves are installed to the frame through connectors, allowing for ease of reconfiguration.

INFILLS

Provide enclosure to the frame. Available in Melamine and PET.

CABLE MANAGEMENT

Cut-outs in the shelves and base allow to drive cable to the power source. Technology can be safely stored behind a lockable door.
